Our integrated circuits and reference designs help you create smarter and more efficient energy harvesting systems that extend battery life and/or eliminate the dependency on battery power. Energy harvesting systems often require: Ultra-low-power harvesting techniques High power conversion efficienc

Since the late 1980s, there have been several attempts to investigate the possibility of harvesting lightning energy. A single bolt of lightning carries a relatively large amount of energy (approximately 5 billion joules or about the energy stored in 145 litres of petrol). However, this energy is concentrated in a small location and is passed during an extremely short period of time ...

A low-energy house is a building that has a very high energy performance and nearly zero or a very low amount of energy required. The house should be covered to a significant extent by energy from renewable sources, including energy produced on-site or nearby (provided that no public grid is used between their production and use).

The importance of harvesting mechanical energy as electrical energy motivates the search for new technologies. Electromagnetic electric energy generators suffer from low power densities and high cost per watt when scaled to the millimeter and smaller dimensions needed for emerging applications (). Piezoelectric and ferroelectric harvesters work well for high-frequency, low-strain deformations ...

More energy hits the earth in sunlight every day than humanity could use in about 16,000 years or so, but that hasn't stopped us from trying to tap into other sources of energy too. One source ...

To promote the benefits of green infrastructure, help communities overcome barriers to using GI, and encourage the use of GI to create sustainable and resilient water infrastructure that improves water quality and supports and revitalizes communities.

Low-cost green housing 6 The alternatives to brick walls like CSEB, fly ash brick wall or SIP all have a lower embodied energy as well as better thermal insulation, leading to enhanced comfort and energy savings in operation.
