Mass transfer is the net movement of mass from one location, usually meaning stream, phase, fraction or component, to another. Mass transfer occurs in many processes, such as absorption, evaporation, drying, precipitation, membrane filtration, and distillation. Mass transfer is used by different scientific disciplines for different processes and mechanisms.

Journal of Heat and Mass Transfer Research is an international journal (print and online) published quarterly by Semnan University Press which was founded in 2013. It reports the latest and most creative research results in the fields of heat and mass transfer including conduction, convection and radiation, phase change phenomena, heat exchanger design and testing, nuclear reactors, geothermal ...

In engineering, physics and chemistry, the study of transport phenomena concerns the exchange of mass, energy, charge, momentum and angular momentum between observed and studied systems. While it draws from fields as diverse as continuum mechanics and thermodynamics, it places a heavy emphasis on the

commonalities between the topics covered. Mass, momentum, and heat transport all share a very ...

A model was developed taking into consideration the heat and mass transfer processes in liquid-sprayed fluidized beds. Such fluidized beds (FB) are used for granulation, coating and agglomeration. Conclusions are drawn on the relevance of particle dispersion, spraying and drying to temperature and ...
