Research Projects Understanding and Exploiting Parallelism in Deep Packet Inspection: Deep packet inspection (DPI) is a crucial tool for protecting networks from emerging and sophisticated attacks. However, it is becoming increasingly difficult to implement DPI effectively due to the rising need for more complex analysis, combined with the relentless growth in the volume of network traffic that ...

Antivirus software, or anti-virus software (abbreviated to AV software), also known as anti-malware, is a computer program used to prevent, detect, and remove malware.. Antivirus software was originally developed to detect and remove computer viruses, hence the name.However, with the proliferation of other kinds of malware, antivirus software started to provide protection from other computer ...
